Festive Colloquium for Peter Scholze

Since Peter Scholze was granted the great honor of being awarded the Fields Medal, the Hausdorff Center organized a grand festive colloquium at the beginning of October in the new lecture hall center. Numerous high-ranking scientific and political representatives attended the celebration in honor of Peter Scholze. One of these was Joachim Stamp, the deputy Chief Minister of North Rhine-Westphalia. Ulrich Görtz of the University of Duisburg-Essen gave the ceremonial address in front of the attendees. Afterward, many continued the celebrations at an after party at the mathematics building until late in the evening.

**The whole colloquium was filmed.
You are kindly invited to watch it again.**

150. birthday of Felix Hausdorff – a Memorial in the city center of Bonn

Besides celebrating the 200 year anniversary of the University of Bonn, we also celebrated the 150th birthday of Felix Hausdorff on November 8th. On this special occasion, the Hausdorff Center informed visitors about the life and work of Felix Hausdorff. At a small booth in the pedestrian area of Bonn (Bonngasse; at the corner to Friedrichstraße), visitors were invited to learn from posters and books about his life and works. The ceremony was opened by the mayor of Bonn Reinhard Limbach. Throughout the day, walks through Bonn and a bike tour to important landmarks connected to Felix Hausdorff such as his family grave at the cemetery in Poppelsdorf took place.

Staging of the play Der Arzt seiner Ehre by Felix Hausdorff

Again regarding the 150th birthday of Felix Hausdorff, the theater ensemble "AKademy of Acting Arts" of the Protestant students' community of Bonn staged the play "Der Arzt seiner Ehre" twice on the first weekend of November, in cooperation with the Hausdorff Center. The play was written and published by Felix Hausdorff in 1904 under his pseudonym of Paul Mongré.

More information on the play and the theater company are available [here](#). Follow this [link](#) to watch the entire play.

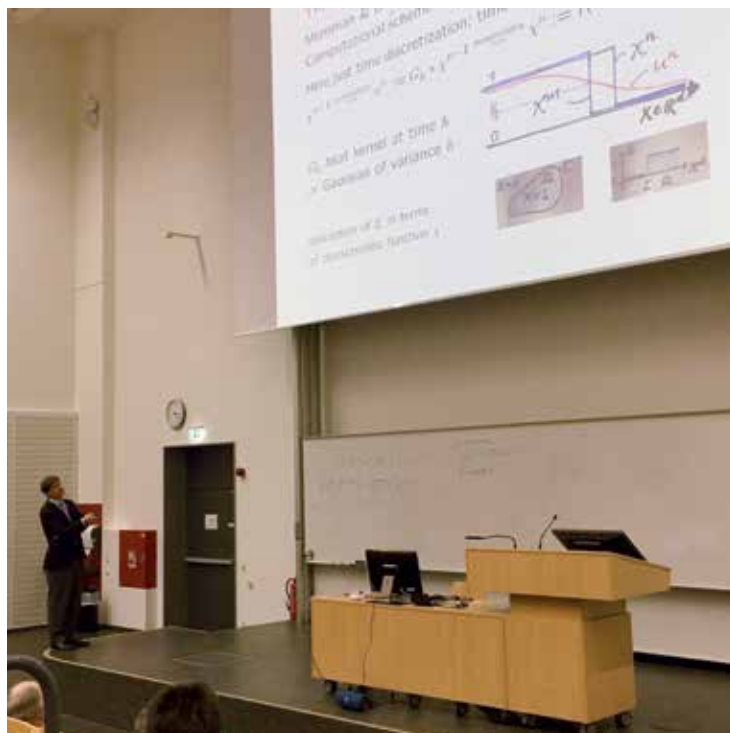

HAUSDORFF PEOPLE

Anne Driemel started to work at the HCM as a Bonn Junior Fellow in the area of theoretical computer science. Her research deals with efficient algorithms and data structures in metric spaces, and their applications in machine learning and discrete algorithmic geometry. Before joining the HCM, she worked as an assistant professor at the Technical University of Eindhoven.

Carolin Kaffiné studies Mathematics at the University of Bonn since 2014 and is doing her Masters degree at the moment. She has worked at the Hausdorff Center for Mathematics for the school team since July and additionally in public relations since October.

Fest der Bonner Mathematik

To celebrate the success in the excellence strategy and the further funding of our cluster for another seven years, the Hausdorff Center for Mathematics held the "Fest der Bonner Mathematik" (celebration of mathematics of Bonn) on November 30th.

The event was opened by lectures of three renowned speakers, Felix Otto (MPI Leipzig), Claire Voisin (Collège de France, Paris), and Harry Yserentant (TU Berlin). Afterward, the attendees were invited to a joint meal and musical entertainment by a jazz band.

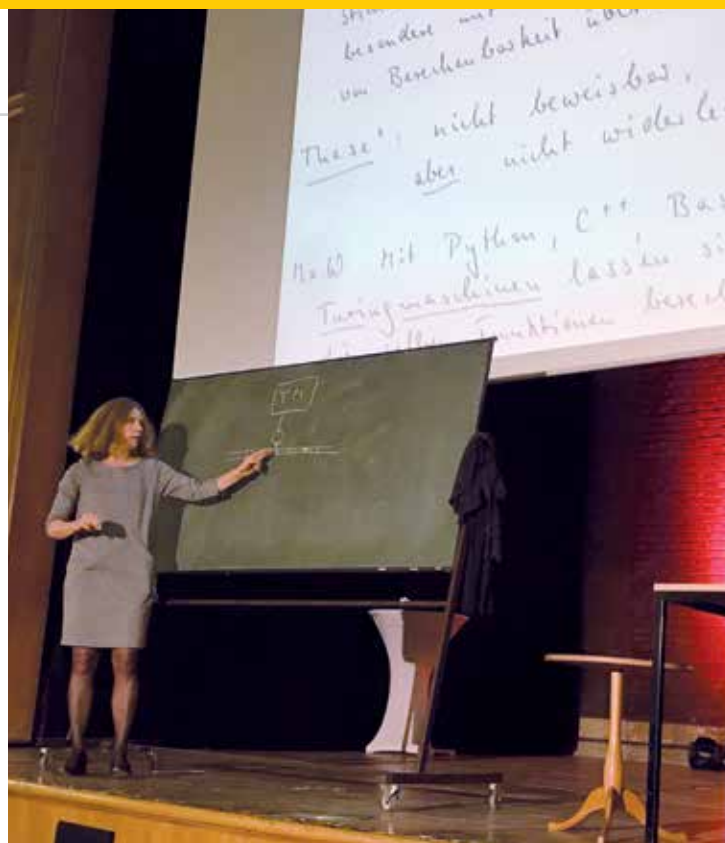

HAUSDORFF EVENTS

New public lecture series of HIM with Katrin Tent

Besides the “Mathematischer Salon”, the Hausdorff Research Institute for Mathematics (HIM) recently initiated a new public lecture series.

The idea is that a visiting professor of the respective fall trimester program holds a public talk on a mathematical topic connected to the current topic and research of the trimester program in a wider sense.

On November 15th, Katrin Tent of the University of Münster talked about “Undecidable problems in Mathematics”. You can watch the entire talk [here](#).

Lectures for the Dies Academicus

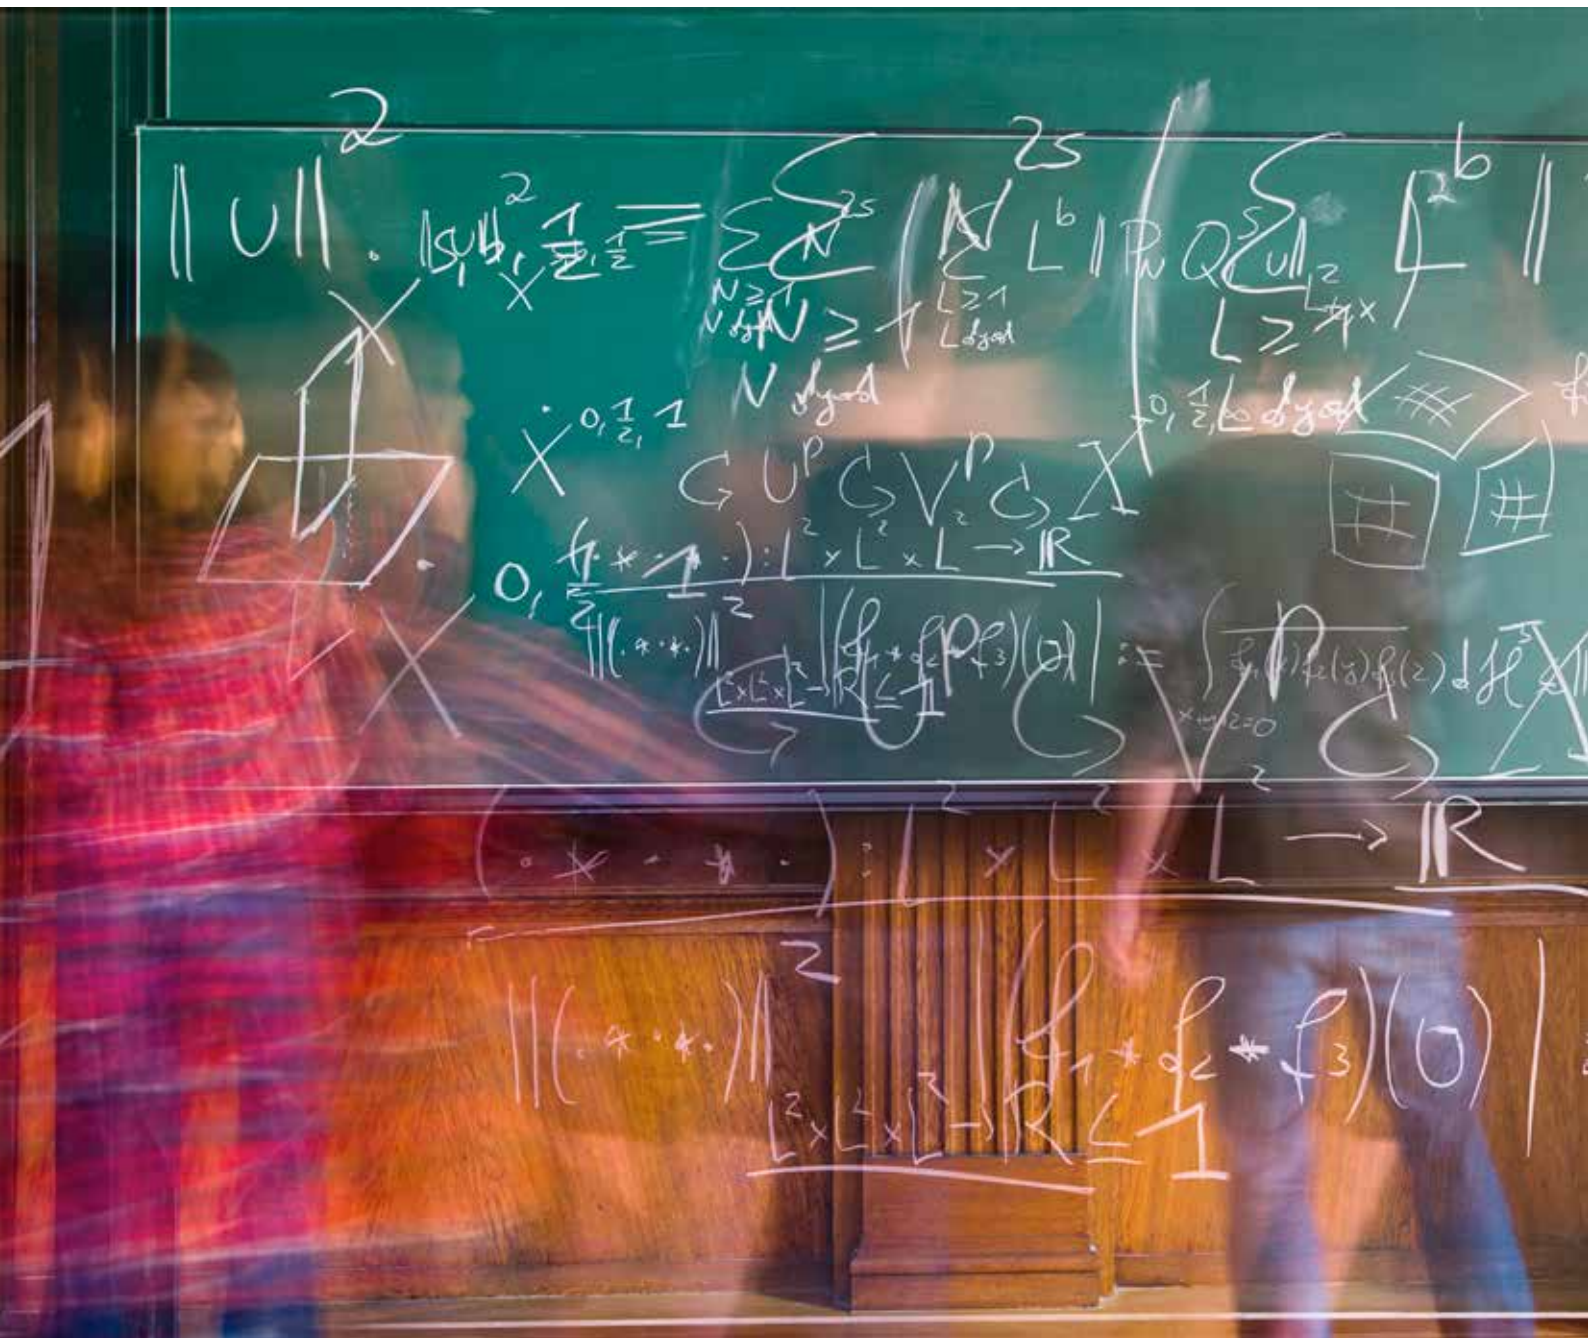

On December 5, the Dies Academicus took place at the University of Bonn. The HCM participated with two lectures as well. Thoralf Räsch held an entertaining talk about the Banach-Tarski paradox titled “Zauberhaft und doch ganz ohne Zauberei” (magical without any magic) and showed to the amazed audience how to transform a single apple into two. The talk “Heute Hü, morgen Hott – Im Spiel mit der wankelmütigen Zukunft” (playing with the wavering future) of Martin Pollrich was held within the scope of a forum of junior scientists on the topic “play instinct”.

Hirzebruch lecture with Tadashi Tokieda

The traditional Hirzebruch lecture at the University Club was held at the end of October. This year, Tadashi Tokieda inspired the audience with the mathematical background of origami, the art of folding a piece of paper into nice shapes, and other interesting phenomena. The successful evening came to an end with the visitors attending a festive banquet.

HAUSDORFF MIXED

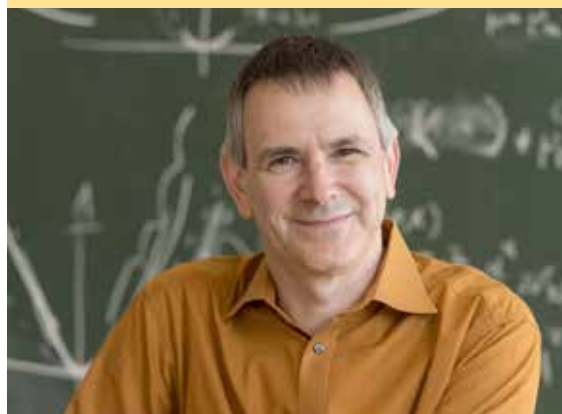

Entry in the Golden Book of Bonn

On December 19, Peter Scholze was pleased to enter his name into the Golden Book of Bonn. Mayor Ashok Sridharan delivered the laudatio and emphasized, among other things, the great importance of HCM for Bonn as a city of science.

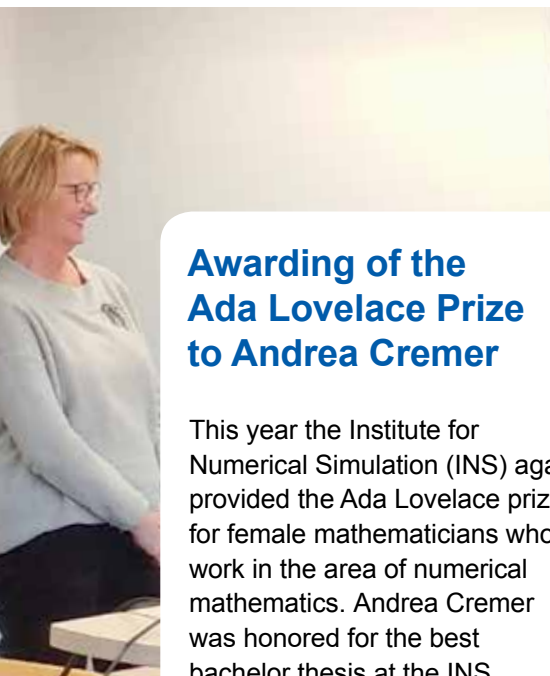

Stefan Müller was elected as Fellow of the European Academy of Sciences

The Hausdorff Chair Stefan Müller was elected as Fellow of the European Academy of Sciences, an independent international association of renowned scientists.

Honorary doctorate for Michael Ortiz

The Universidad Politécnica de Madrid (UPM) awarded Michael Ortiz an honorary doctoral degree. The official ceremony will take place in 2019.

Awarding of the Ada Lovelace Prize to Andrea Cremer

This year the Institute for Numerical Simulation (INS) again provided the Ada Lovelace prize for female mathematicians who work in the area of numerical mathematics. Andrea Cremer was honored for the best bachelor thesis at the INS.
