

Functional Data Analysis— A Workshop in Honor of Alois Kneip

Organizers:

Joachim Freyberger (University of Bonn), Dominik Liebl (University of Bonn)

Venue: Lipschitz lecture hall · Mathematics Center · Endenicher Allee 60 · 53115 Bonn

On the occasion of Professor Alois Kneip's retirement and in honor of his academic career, this conference centers around the scientific contributions and interests of Alois Kneip—including nonparametric statistics, functional data analysis, and nonparametric frontier models. The workshop aims at bringing together statisticians with diverse backgrounds, providing a platform to exchange their ideas and foster new collaborations.

Speakers:

- Aurore Delaigle (University of Melbourne)
- Marie-Christine Düker (University of Erlangen-Nuremberg)
- Frederic Ferraty (Paul Sabatier University - Toulouse III)
- Irène Gijbels (KU Leuven)
- Sonja Greven (Humboldt University of Berlin)
- Wolfgang Härdle (Humboldt University of Berlin)
- Hans-Georg Müller (University of California, Davis)
- Sven Otto (University of Cologne)
- Valentin Patilea (Patilea University Rennes, ENSAI)
- Jim Ramsay (McGill University, Montreal)
- Pascal Sarda (Paul Sabatier University - Toulouse III)
- Léopold Simar (Université Catholique de Louvain)
- Eftychia Solea (Queen Mary University of London)
- Fabian Telschow (Humboldt University of Berlin)
- Jane-Ling Wang (University of California, Davis)

Call for participation: Participation is free. If you are interested in participating, please fill out the application form: <https://math-events.uni-bonn.de/event/64/abstracts/>. Successful applicants are selected based on research background. Participants are welcome to join at their own cost.

The deadline for applications to participate in the workshop is January 26, 2025 (CET).
